The making of a doctor,

An ancient formula:

To start with determination

To shun the world in order to

Retreat into many nights of hard study

And long days of thankless toil,

To receive instruction and encouragement

From those who have dedicated

Themselves to one purpose:

To aid the student in embodying

The traditional qualities of a physician-

The heart of a lion,

The eye of an eagle,

The hand of a woman.

Dedication

Too often the energetic and conscientious laborer remains behind the scenes while others reap the glory of what has been accomplished. It is the aim of the class of 1966 to give recognition to such a diligent worker. Mrs. Dorothy R. Peuser is known to all as the one who fulfills the various duties assigned to her as College Registrar. But not well known is the amount of extra time she continually devotes to counseling the students on problems they face in their trek through medical school. Even in the face of sundry responsibilities, she takes time to see any student earnestly requiring her help.

Though often tired and drained by work, she keeps her best foot forward with a smile and cheerful voice.

It is therefore with pride that We, the Class of 1966, dedicate this yearbook to Mrs. Dorothy R. Peuser, a great lady and a friend.

To the Seniors:

The past four years have surely included the most important years of your lives. No similar period could have been so filled with maturing and challenging experiences and with opportunities for extending your horizons. If you have really learned how to learn, the years to come

will see the continuation of your professional growth. I believe you have, and that each succeeding year will find you better and wiser physicians.

For the faculty, and for myself, I want to extend our best wishes for a successful career to each one of you.

Class Advisor - Dr. Eva Fox

The miracle of yesteryear is the commonplace today. So it is that the quest for answers is persistently lifting the veil. You young doctors enthusiastic with the zeal of practice are endorsed with all the answers we have to offer. You are

understandably proud of your accomplishments, and so are we. However, as knowledge is tempered by time to wisdom, walk humbly in the shadow of the Great Healer and be a modern miracle worker to those in need.

The Oath of Maimonides

Thy eternal providence has appointed me to watch over the life and health of Thy creatures. **M**ay the love for my art actuate me at all times; may neither avarice nor miserliness, nor thirst for glory, or for a great reputation engage my mind; for the enemies of truth and philanthropy could easily deceive me and make me forgetful of my lofty aim of doing good to Thy children. **M**ay I never see in the patient anything but a fellow creature in pain. **G**rant me strength, time and opportunity always to correct what I have acquired, always to extend its domain; for knowledge is immense and the spirit of man can extend infinitely to enrich itself daily with new requirements. **T**oday he can discover his errors of yesterday and tomorrow he may obtain a new light on what he thinks himself sure of today. **O**, **G**od, **T**hou hast appointed me to watch over the life and death of Thy creatures; here am I ready for my vocation, and now I turn unto my calling.

SK&F Foreign Fellows Have Gone to

INDIA, TANZANIA, IRAN, GUATEMALA

At hospitals and medical outposts abroad, medical students contribute to international understanding and goodwill by helping to provide much-needed medical services to people in developing areas of the world.

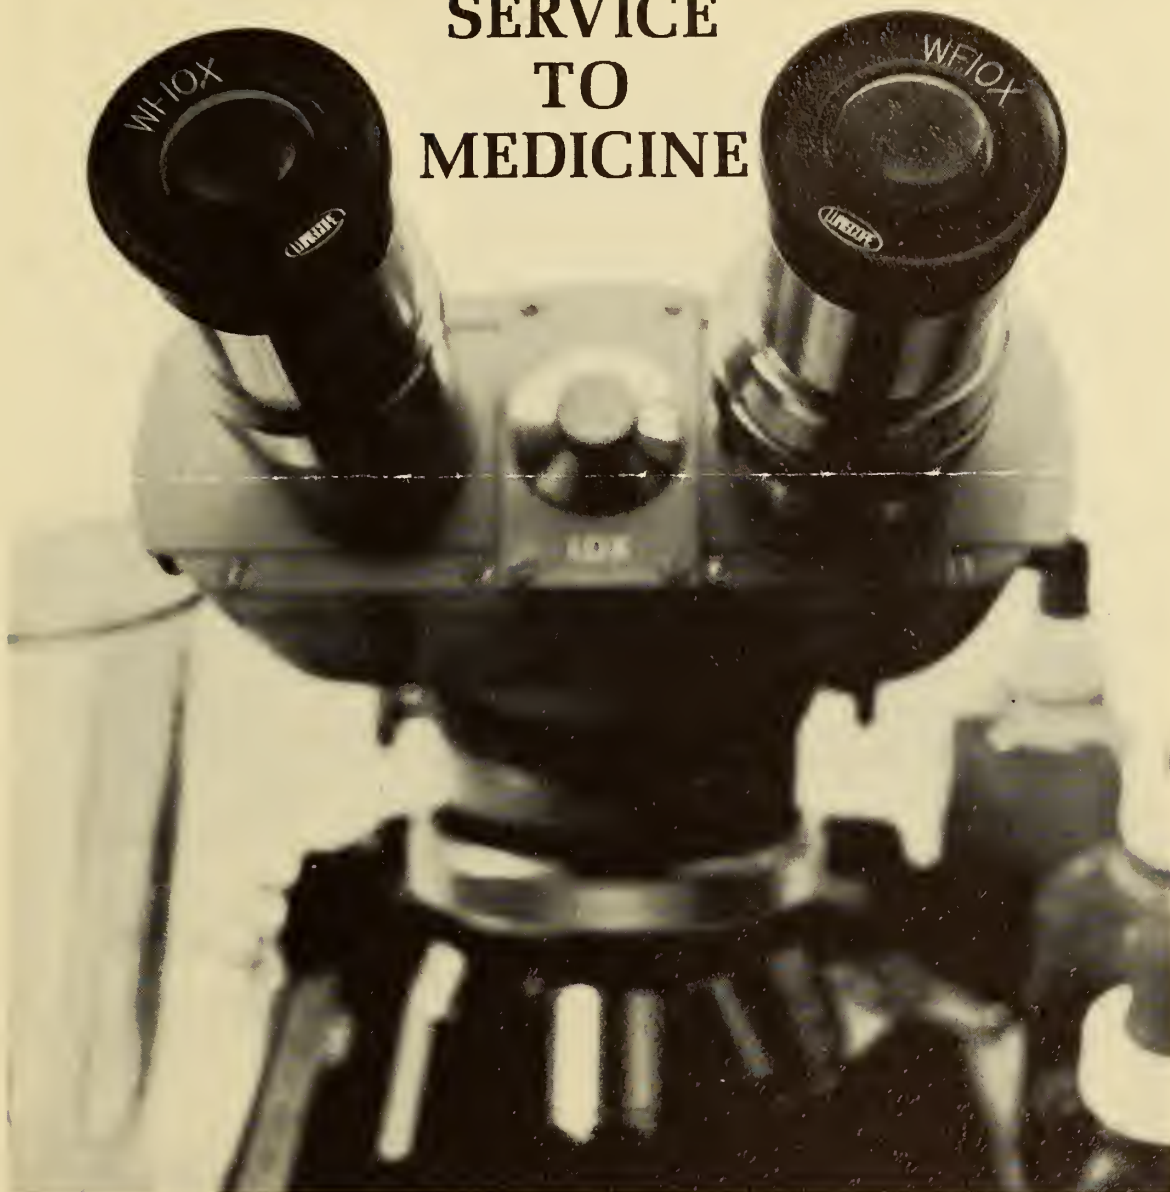

This unusual opportunity to work and study in foreign countries is offered to students through the Foreign Fellowships Program of Smith Kline & French Laboratories. Administered by the Association of American Medical Colleges, the program has enabled 180 students to work and study in more than 40 countries during the past six years. Junior and senior medical students are eligible for Fellowships, which provide on the average 12 weeks' work abroad, to be completed before internship. Interested students should apply through the deans of their schools.

Smith Kline & French has published an illustrated 24-page booklet telling the story of SK&F's Foreign Fellowships Program. For your free copy of "Fellowships in Medicine," write to: SK&F Services Department, Smith Kline & French Laboratories, Philadelphia, Pennsylvania 19101.

SERVICE TO MEDICINE

your new credo, your constant challenge

Your knowledge, skills, talents—acquired through the past long years of dedicated study—are now to be put to the greatest test of all: SERVICE TO MEDICINE.

Wyeth Laboratories is proud to be a partner in your endeavor,
providing you with therapeutic agents of proved merit,
continually searching for new products and techniques to
meet the ever-changing needs of modern practice,
offering you the services of thoroughly trained representa-
tives to fulfill the needs of your own practice.

Our credo, too, is "Service to Medicine."
